

STICK FIT EXTENDA FENDAS

Can be fitted with the guard on or off the bike.
(We recommend the guard is left on where possible)

Thoroughly wash and degrease the inside face of the guard using the alcohol wipe supplied.

Check fit of the Extenda Fenda on the guard before removing the tape.

Remove backing tape and fit Extenda Fenda (removal and repositioning is possible with the high bond adhesive tape).

When you're happy the Extenda Fenda is correctly positioned, press all round the joint face with finger pressure. It is advisable to apply spring clamps or similar to the extreme/outer ends to ensure good contact.

FULL ADHESIVE STRENGTH TAKES SEVERAL HOURS. DO NOT RIDE OFF IMMEDIATELY!!!

WE RECOMMEND THE BIKE IS LEFT OVERNIGHT BEFORE RIDING.
